

Caring for your lining

Regular care will minimise the need for additional cleaning. Always exercise caution when spot cleaning - test on a non exposed surface.

To extend the life of your linings, regularly vacuum with appropriate attachment and air your curtains. All guardian linings can be professionally washed or dry cleaned.

For all coated fabrics professional cleaning is recommended. If you are cleaning yourself hand wash in cool to warm water. Mild detergents recommended. Do not bleach or soak, rub or wring. Drip dry in shade and hang curtains by their hooks to avoid sides touching - do not use pegs. Warm iron on fabric side only. Bumph linings are dry clean only.

Why choose Charles Parsons Guardian Linings?

- Guardian linings are locally made from superior materials to imported product.
- All Guardian linings are washable and drycleanable
- Guardian linings are extensively performance tested and are of the highest quality.

Why Choose Guardian Linings

New Zealand Made.
Quality Guaranteed.

CHARLES PARSONS
Interiors Est. 1915

Quality Linings, New Zealand made

All of Charles Parsons linings range are locally made. This is important when in recent times the market has been flooded with imported product. Unlike many of these products Guardian linings are all dry cleanable and washable while being supported by our 3 year quality guarantee.

A good quality lining is essential to protect your drapery from harsh UV rays and provides extra insulation - whether you want to stay cool in summer or warm in winter. All of our linings have had extensive testing and been specifically developed to meet Australian and New Zealand performance requirements.

Guardian also supply fire retardant linings in selected lines. These FR Products meet all government requirements and are suitable for residential and commercial use. Flammability of fabrics is an important safety consideration when selecting a suitable lining.

Charles Parsons Guardian Ultimate FR 3 Pass lining complies with AS/NZS 1530 Part 2 and Part 3.

How do I choose the most suitable lining for my home?

Industry standard means that coated linings are available in 1, 2 and 3 pass qualities. Below we have broken down the different grading in our guardian linings so you can make an informed choice on which lining best suits your needs.

GUARDIAN 1 PASS LININGS

Guardian 1 pass linings features a single layer of Supersoft Suede® coating and will produce a soft, filtered light for areas that do not require total light control.

GUARDIAN 2 PASS LININGS

Guardian 2 pass lining features two layers of Supersoft Suede® coating and sits between a 1 pass coating and blackout.

GUARDIAN 3 PASS LININGS

Guardian 3 pass linings feature multi layers of Supersoft Suede® coating and is essential when total light control is required.

GUARDIAN UNCOATED LININGS

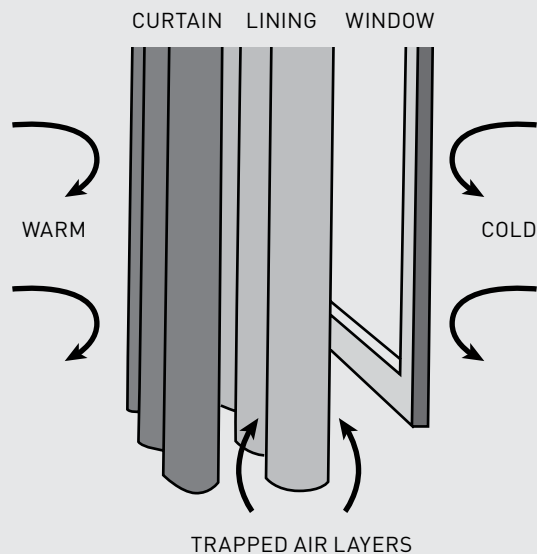

Some linings do not require blackout/sunout properties as the windows may have other forms of protection from the ultra violet light. Guardian offers a range of non-coated linings for various applications.

Universal/Regal is a plain weave polyester/cotton lining. This lining is often used with fabric that requires added fullness and to improve the drape of the curtain.

Supreme/Danemarca is high quality woven sateen with a soft lustre appearance for an elegant decorator look. It is suitable when decorating with quality fabrics that require a delicate make to achieve an exquisite finish.

Bumph is an interlining commonly used with delicate fabrics or to specifically assist in reducing sound. It is normally positioned between the face fabric and the lining, Bumph is a dry-clean only fabric.

Guardian Sheerline is knitted polyester lining with good handle and draping qualities.

Guardian	Blockout	Insulation / Energy Saving	Wash / Dryclean	Sound Reduction	Fire Retardant
1 Pass	45%	✓	✓	✓	
2 Pass	*99%	✓	✓	✓	
3 Pass	99%	✓	✓	✓	Selected Lines
Universal		✓	✓		
Supreme			✓		
Bumph		✓	✓	✓	
Sheerline			✓		

*Please note 2 pass has a grey backing vs. white, being more aesthetically pleasing when curtains are drawn
